**Importance:** High

Here's a little blurb to start. I highlighted two spots

1. Can you ladies in the field fact check this first highlighted sentence: Particulate air monitoring has been conducted in 4 locations surrounding the fire 24 hours a day as weather and field conditions permit since this start.
2. Did we get confirmation from ATSDR that we can compare our TWAs to the AQI values? Also, the link will be taken out when we submit to HQ, I just wanted it in there in case you wanted to reference it.

I wasn't sure what the verdict was as far as giving an interpretation of the data. If we need to list out, "during this monitoring period, at this location, the TWA exceeded "Unhealthy" AQI standards..." let me know, and I can add it.

Otherwise, please pick apart as you see fit. Fran, do we have a deadline for submitting to Joan?
